Hi Kelly. Here is the Bay Delta NEPA comment letter that I mentioned at today's OPA meeting. I will be reviewing it today, and our goal is to get it to Cliff Rader in OFA by COB Friday. If it would be helpful to you to get a quick walk-through of the letter and detailed comments before you start looking at it, please let us know and we'll set that up asap.

Hi all: Attached please find the current version of the BDCP letter. I am sending it to you so you can review it before we send it to Cliff Rader by COB Friday. Huge thanks to Kathy, Stephanie and Erin for getting it to this point.

I am going to review it today. If you have comments/edits please send them to Kathy, Stephanie and me asap, but in time to incorporate them into the Friday version to Cliff. The Friday version will begin HQ's preliminary/programmatic review. Other R9 reviews can continue during this time. We will then incorporate HQ and R9 comments and then re-send for OECA AA concurrence at least 1 week before the 7/29 deadline. Stephanie is working on a detailed schedule with reviews, turnarounds, and concurrences and we will share that with you shortly.

Subject: BDCP Cover Letter and Detailed Comments

Lisa –

Attached are the revised cover letter and all of our Detailed Comments. The Detailed Comments

are currently split between two documents. The “Major Issues” document elaborates on the showstopper issues highlighted in the cover letter and provides the primary support for the rating. The “Additional Comments” document contains all of our other comments. Most of them are substantive and we need to be on the record as having raised them, but they are not the big showstoppers (although some of them further support the showstoppers). I have spent most of my time on the cover letter and the “Major Issues”, both of which are now reasonably well polished. We are still formatting the Additional Comments and looking for ways to shorten them (Stephanie took a crack at that today and I have accepted all of her edits), but I think they are in good enough shape that they should be included in the package for review. Whether we keep them as a separate attachment or merge them at the end of the Major Issues is something that can be decided later, once everyone is comfortable with the substance.

I’m sorry it has taken so long to get this revision to you. I appreciate your patience.

-Kathy
